Graduate Student Internship—Summer 2014

Mercy Housing Northwest is an active nonprofit affordable housing developer, manager and resident service provider in Washington state. We are looking for a graduate student for a paid internship with us for the period from June to early September. Position is for 20-24 hours per week.

Work will involve assisting our affordable housing real estate development staff on funding applications, project management, preparation of collateral material and other related tasks. Our current pipeline includes a TOD-project in Seattle, a new construction senior housing development in Tacoma, renovation of 200-existing units in Snohomish County and a USDA Rural Development portfolio in Skagit County.

We have had very positive experiences with prior interns, and we expect the position will provide exposure and practical experience from working on a variety of developments.

We are looking for a graduate student with coursework and/or work experience in housing policy, housing finance or other exposure to affordable housing programs.

Please email resume to Sara Snyder at ssnyder@mercyhousing.org

Position is open until filled.
